Healthy Start Vouchers – Applications Made Simpler

27/04/2020

Families can now apply for Healthy Start food vouchers without a health professional’s signature on the form, as was previously required.

Healthy Start is the UK’s food welfare scheme for pregnant women and young children in low-income families. The vouchers, worth £3.10 per week, can be used to purchase fresh fruit and vegetables, milk or infant formula, and vitamin coupons are issued in addition. The application process and other issues have limited their reach, with uptake between 51% and 62% in Greater Manchester’s boroughs, charted by GM Combine Authority. This means many families are currently missing out, costing close to an estimated £4m per year across GM.

However, the regulations around the application process have now been changed, so Healthy Start application forms (which can be found here) no longer require a health professional to complete and sign Part B. These new regulations are welcome during the Covid-19 pandemic, as families at risk of food poverty desperately need support to buy healthy food, and health professionals are already at capacity.

"Low-income families need to be able to access all available support during this time of economic and social upheaval, so the timing of the new regulation is very welcomed as they will enable pregnant women, parents and carers to apply without having to seek out a health professional. Simplifying the application process is something that’s been needed for years and we are so glad to see it happening now, when it is vital to improve food access for our most vulnerable families," says Maddie Guerlain of Sustain.

We are calling on relevant agencies across Greater Manchester to do all they can to make more residents aware of the scheme, and help eligible residents to apply.
